PROFILE

Frontend-focused Web Developer with strong skills in HTML5, CSS3, JavaScript, and responsive UI design. Experienced in building cross-browser compatible, mobile-first web applications using modern frameworks and libraries like React.js, Bootstrap, and jQuery. Skilled in debugging, testing, and delivering clean, scalable code. Strong communicator with experience working in teams to deliver projects efficiently.

SKILLS

Programming Language : C, JavaScript, Java(basic)

Front-End: HTML, CSS, Bootstrap, Tailwind CSS, Material UI, jQuery, React.js, Zustand

Back-End: Node.js, Express.js, REST APIs, Axios

Skills: SocketIO, LottieFiles, Skiper UI

Databases: MySQL, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Postman(API testing)

PROJECTS

LoopIn – Connect and Chat in Real-Time

- Built with React.js, Node.js, Express.js, and Socket.IO for instant messaging.
- Managed state efficiently using **Zustand**, secured with **JWT authentication**, and enabled image uploads with Multer.
- Designed mobile-first UI with Tailwind CSS and Lottie animations.

Snipsy - Create and share beautiful images of your source code

- Paste or write source code directly in the editor
- Customize themes, fonts, background colors, padding, line spacing, and shadows
- Choose from popular syntax highlighting themes
- Export and download their code as high-resolution images (ideal for retina displays)

Note App with Draggable Features

- Developed a modern, drag-and-drop note-taking application, allowing users to organize notes efficiently.

Ride-Sharing Web Application

- Developed with React, Node.js, Express, MongoDB, and PostgreSQL.
- Integrated Google Maps for tracking and Stripe API for payments.
- Responsive UI with Material UI and Tailwind CSS.

EDUCATION

- **Lloyd Institute of Engineering and Technology |** **2024-2026**
  Master of Computer Applications

- **Asansol Engireering College |** **2021-2024**
  Bachelor of Computer Application
  - CGPA: 8.26
